Hands-on training sessions

MASTERCLASS IN MINIMALLY INVASIVE TREATMENT IN PEDIATRIC UROLITHIASIS

It is our privilege to invite you to our Masterclass in Minimally Invasive Treatment in Pediatric Urolithiasis. This Masterclass will focus on percutaneous and endourological procedures using the latest techniques in minimally invasive pediatric urology (microperc, miniperc and RIRS). During the morning session there will be live and pre-recorded surgeries transmissions followed by lectures conducted by outstanding professors with an up-to date and practical content related to hot topics on pediatric endourology and management of urolithiasis in children and hands-on training sessions.

We are looking forward to hearing from you and welcoming in Fundació Puigvert.
